WeDmand

A: What is WeDmand?

B: WeDmand it is a app to help people and companies to find out which products or services have demands not met in a certain location.

A: Well...that didn't help..what does it do?

B: Well let me simplify. Have you ever trouble finding a good coffee shop near you?

A: Yes, I always wanted a coffee shop near my house or my work, but the closest one is one and half mile away. The funny thing that the neighborhood is great. Many other people also say they wanted a place to drink coffee, talk to friends, and read a book.

B: That's exactly what WeDmand would like to do. WeDmand is a tool designed to collect all this data of things and services that people want, and find out business to match that demand.

A: Oh I see. You try to fix the supply and demand market failure for small business.
