Marketing and Sales Experiments Analysis and lessons learned

We published a survey made in google docs to find out if there is interest in workshops about Artificial Intelligence, Deep Learning, Machine Learning, and Python programming.

Unfortunately, the short time we have to provide this assignment dos not help us to collect all the information we need to have a clear picture. Nevertheless, we do see the following:

Age group: from 28-31 and some cases of older people (35, 40, and 50)

Occupation: 1) Student, 2) Student with a PhD, 3) Teacher, 4) business owner, 3) employee

Price: The majority proposed the price of 300 swedish crowns for workshops.

Topic: 1) Artificial Intelligence, 2) Machine Learning, 3) other

Location: Stockholm

Days and times: they differ but it is mostly in the evening.

Note: We are still gathering results via a meetup group where we published our link.

We also asked their opinion about online courses and what could be improved.

Price for renting a space the workshops: coming soon
